

KEEP IT PUSHING

My name is Gilbert J. I am an American blog writer from Los Angeles, California. Born with Spina Bifida, I've always wanted to use my life challenges to help and inspire others who have shared similar experiences.

Everything I have been through and all the personal knowledge I've gained, I can share with others. My motivation in launching this blog is that it'll make the process a little easier for the next person. By highlighting adaptable products and available resources, **Keep It Pushing** e-newsletter is your virtual buddy for quality information.

September is:
Blood Cancer Awareness

National Suicide Awareness

World Alzheimer's Disease Awareness

Company Spotlight: Coloplast USA

Hello September! I decided to spotlight this month a company named Coloplast, which is known for developing products and services to make life easier for people with deeply personal and private medical conditions. These conditions range from wound care, bladder and inconvenience management to traumatize injuries, kidney issues, colonoscopy patients, and other various conditions. Founded in 1957, its creation was based years earlier off an idea by Elise Sorensen. Elise was a nurse whose sister struggled with the after affects of an ostomy operation. Listening to her sister complications, she developed the idea for the first adhesive ostomy bag. From this idea Aage Louis Hansen, a civil engineer and plastics manufacturer, and his wife Johanna, a trained nurse, were able to invent the first portable ostomy pouch! This not only helped Elise's sister but thousands of others with similar conditions. . Since then Coloplast has grown from a small family business to an international corporation with ...

Organizations for the Betterment of Mental Health

thousands of employees and customers worldwide. Their main headquarters, Coloplast USA, is located in Minnesota but they have numerous locations all over the country as well as internationally in Canada and the United Kingdom. Its international headquarters is in Denmark. . I am hoping for the opportunity to interview a representative from the company sometime this month and if I can facilitate it, I will post the live interview as well as this regular written format. Until then check out their full story and list of services at their website:

www.coloplast.com

I look forward to sharing the interview with you and hope you check out our Instagram and website for more updates and news. Also if you haven't already check out our featured interview on accessibility with Marine X on YouTube @:
